this game essentially boils down to guessing which conversation tree will impact one of the 4 healthbars you must try to prevent from dropping to 0 or reaching 100. the impact of your choices on these healthbars is often arbitrary and, when not, force you to act out of character. there's no clear win condition or way to strategically build towards an end.. Wow. Great stuff by Richard and crew with this game. Love the branching out of storylines and love the new twists that are in the game (such as the interracial aspect, etc.) This is a hit with my streams, and can't wait to play out all the chapters, and go in and find alternative endings of some chapters. Also appreciate the discounted price for owners of the original Super Seducer game, great plus.. The best Anno and one of the best resource management games you will ever play.. This game sucks... Humble bundle tho. The fire nation will attack in this game, and will leave everything burned down to a crisp. This game looks too cute to take seriously but it proves that wrong when you're still in the first stage, it's difficult even on the normal settings, I enjoy a challenge, and if you do, I totally recommend his, how cute it is will hurt you even more everytime you lose.. 10/10 Game right here boi Just gotta set that polling rate to 125 for your mouse, max those settings out with that resolution, then restart, and you're good to go.. ing god dammit thumbtack. Oh gosh, can't even describe how excited I am for this game when I see it on steam. Ever since a similar online game closed in my area, I was upset for awhile, until this. The game is simple, you can see everything you can do in the screenshots, but the potential of expanding is much much larger than just stopping by the customization pack, and I can ensure that the domestic won't affect at all, the balance of the game play, so give yourself a chance, consider this is one of the best free to play and casual game to relax on the market at the moment. Only 0,7 hours in and have already won 10 matches, I remember when I was a champion in the mention similar game of mine.

Bottom line, you MUST try this game! Either for you or your friends or for your kids, it suits all!

edit 24/4/2018

After leaving a thumb up for months and bought the customization pack to support the dev. now I need to leave a thumb down until there's a new upadte of the game. It's been forever already.. Even though my time shows a few hours, I have put so many more into this game on other consoles. It is still the same experience for the most part. Being an RTS, you genuinely have to think and plan to be successful in this game. Even if you find the AI to be a pushover, there is harder difficulties. While this game does have many pluses, it does have some negative aspects to it. For one, the microphone/speaker aspect of the game is fairly complicated, as there are many options to choose from, with no reminders within the game. Also, the reception of sound within the game is fairly unbalanced as well, which can lead to frustrating command mistakes. However, this does not break the game in any way. It is still completely playable with a mouse. Another letdown is the lack of multiplayer community. Its not that the game doesnt support it, but that in general the game isn't super popular. Playing with or even against a friend gives the same impression as playing online. Overall, this game is fun to play, and will be a steal if you can grab it for a few bucks.

Best RTS i have played in a LOOOOOONG time, far better than its higher budget competitors. If you love space combat and galactic conquest grab this game, if not grab the demo.. game very the terrible. Wood Elves are my favorite team in this game, period. So far I have had the most fun with this team as well as the Chaos Dwarfs in Chaos Edition\u2026 But even as I recomend it I will give some feedback that is worth considering before you buy them.

Wood Elves is the second fastest team in the game after the Skaven IIRC, it makes your team good at moving the ball for the optimal pass, handoff and rush towards the end goal. They have one of the best if not THE best level one character in the Wedancer and their catchers start with a good amount of skills that is well worth their asking price. They are also the only Elven team that sport a big guy that is also a big guy that is stronger than all other big guys.

So\u2026 there is some negatives here. All chars bar the tree have armor value 7 thus making them injury prone and there will be times where teams might implode as their high cost and replacing dying or ruined pieces is hard or impossible goal. All the positions are disgustingly expensive as they are good, so getting new of them is a goal for a season rather than an off hand cash spend. The tree have a 50% chance to not stand up if he is knocked over making him slow and sometimes unreliable but he soak damage for the frail Elves and I feel he is worth it long term but he is not NEEDED.

If you want an Elven team that is fast, agile, good at stealing the ball and can move the ball from one end of the pitch and toss it to other side with EASE then I would recommend these \u2665\u2665\u2665\u2665\u2665\u2665s as they are the gods of Elve\u2019s \u2665\u2665\u2665\u2665\u2665\u2665t. If you want a team that is different to what is offered in the core experience well these are not it. I would recommend Undead, Necromantic. Lizardmen or the Norse to get teams that stand out more to the core races to be honest but if you want what these guys give, then they are just plain FUN. Painfull when losing half the team at times\u2026 but fun!

Also, if you do not play Wood Elves - A prone Wardancer is in need of his head being kicked in, so remember that and make it happen!. Picked up right from where I left off, great game!. I like the storyline and the action behind it that I hope that there will be sequel for more adventure.. This game is a fun platformer with unique graphics, strange location of stages, and a fun set of NPCs and characters. The music is great fun that bounces. The platforming is challenging without being overwhelming with a way to challenge yourself if you feel that it's not challenging enough. You can unlock and earn character make-overs, added effects, and arcade games. There seems to be quite a few levels to try and the main hub of the game, Slumptown, has a few strange places to explore.

Want to know more? You can check out my videos on YouTube. The first one wasn't that great because I'm not use to playing platformers with a keyboard while the second I managed to play with a controller.

I hope others enjoy this game as much as I have. Can't wait to play more. :D. Great addition! Wish we had converter from IMPERATOR TO CK2 and EUIV to VIC II and fro VICH to HOI IV .. Outstanding, i do like complicated planes like the a10c but this is just so fun and amazing with friends. Would recommend and its very simple but also is a blast when flying aerobatically 9V10 its just amazing but its not perfect im still trying to find why its not perfect.

. Really enjoyable game. I had to really cudgel the old brain cells on some of the puzzles but it was awesome to figure them out on my own. Felt like a great brain work out. Highly recommended.. Really enjoyed the lisening to the soundtrack after playing the game.

File are 320kbps mp3's. FLAC would have been much nicer, but still worth it.

Medieval Shopkeeper Simulator Orphan Age **Orphan Age's Alpha & Demo versions 19.04 are live!**:

Hi, this is Maxime & Adrien from Black Flag, if you are reading this, it's because a new version of Orphan Age and its demo is available! So, what's on the menu? Lots of good news!

First of all, we have started the complete redesign of the interface: the texts are larger, more spaced and more readable. We have also reorganized the information to make it easier to read. We have also improved the tutorial and the general ergonomics.

In order to enter the more pleasant controls, there is no longer any need to right-click on the objects to interact with them, a simple hover is enough!

We have started to completely redesign the quest system and we hope to be able to publish it next month! The next update will focus on HOPE. Hope represents the willingness of orphans to continue to search for their parents. Each event, each successful or failed quest will affect everyone's Hope. But if Hope falls to zero, the Orphans will abandon the orphanage and the game will be over.

Hope will put the emphasis on survival and it is the last major gameplay brick missing from Orphan Age. This means that from May onwards, we hope to focus on adding content and polish in order to consider a release later in the year!

In the middle of these important announcements, we also fixed a lot of bugs, here is a non-exhaustive list:

- Non responsive or bugged buttons
- You can now delete your previous save game
- The auto saves are now limited to 5
- The Button to select an Orphan has been fixed

-
- The looted objects now have their proper names displayed
 - Most of the numerous exploration bugs has been squashed
 - You now start without a resource storage you have to survive on your own now!

Please leave us any feedback here on in [Discord](#)[discord.gg] and don't forget to use the in game bug tracker on the top of the screen if you have any issue!

Cheers!
Adrien & Maxime

PS: you might want to clean your previous saves in the load menu. Very old saves can create issues with exploration. :)
